STATUS BOARD — Tonight complete (honest non-claims)

Updated: 2026-09-11 (America/New_York).
House rules: no Clay-closed stamps; no finished-ToE certificate; GATE-04 collection **LOCKED**; one lemma / finite probe each.

Shelf: `/workspace/DOWNLOAD_PDFs/` · Mac: `~/Downloads/DOWNLOAD_PDFs_2026-09-11/` and `~/Downloads/`.

tonight_ten — outcomes 1–10 (honest)

#	Item	Outcome (one line)	Claim level
1	Forced-NS sentence lock	Fefferman C/D vs unforced hygiene note; Buckmaster/Alpoge named	**NOT** Clay / NS solved
2	Formal-Conjectures Erdos stub	Erdos 742 Murty–Simon: Lean stub still `sorry` (no Lean on box); finite enum $n = 3..7$ has 0 violators of $\lfloor n^2/4 \rfloor$	**NOT** full Murty–Simon
3	R(5,5) bound ledger	Lit $43 \le R(5,5) \le 46$; independent $R(3,3) = 6$ certified	**NOT** $R(5,5)$ exact
4	Dedekind / lonely-runner / cap-set	Lonely-runner tight $k \le 7$ PASS; cap-set $a(0..3)$ exact + $a(4) \ge 20$; Dedekind $M(0..6)$ box-match; next open exact Dedekind $n = 10$	**NOT** LRC / asymptotics / $M(9+)$
5	Chromatic plane graph hunt	Moser spindle $\chi = 4$ certified; standing lit $5 \le \chi(\mathbb{R}^2) \le 7$	**NOT** $\chi(\mathbb{R}^2)$ solved
6	Hilbert 16 quadratic intervals	Lit $4 \le H(2)$; IL restricted bound finite-astronomical; one named Q1 sign-bracket	**NOT** $H(2)$ solved
7	BSD rank ≥ 2 L-pipeline	Cremona **389a1**: a_p match LMFDB through $n = 19$; Dokchitser **not** re-run (no Sage/PARI); lit Sha ≈ 1	**NOT** BSD proved
8	De Bruijn–Newman / zeta zeros	Lit $0 \le \Lambda \le 0.2$; Z-isolation 30/30 on box	**NOT** RH
9	Union-closed / Gilmer remainder	Enum $n \le 4$ + random $n = 5..8$ all $\ge 1/2$; lit floor $\sim (3 - \sqrt{5})/2$	**NOT** Frankl solved
10	P vs NP barrier memo	Natural proofs + algebrization barriers stated	**NOT** a $P \ne NP$ / $P = NP$ proof

Stop rule honored: each item is one hygiene / finite lemma / ledger — no prize language.

Track C — theory hygiene 1–3 (agenda only)

#	Note	Status
C1 / C2	GKSL reservoir derivation agenda	**OPEN** (agenda) — no completed microscopic derivation
C3 / C4 (hygiene #2)	Hidden-sector S–E backreaction agenda	**OPEN** (agenda) — no coupled solution / no exact κ_E
C3 / C4 (hygiene #3)	Radiative sequestering / Higgs-facing operators agenda	**OPEN** (agenda) — no sequestering theorem

All three: **methods/theory only**; **do not invent J/apparatus**; **do not unlock GATE-04 collection**.

PDFs: `TrackC_GKSL_reservoir_derivation_agenda`, `TrackC_hidden_sector_backreaction_agenda`, `TrackC_radiative_sequestering_agenda`.

GATE-04 — collection LOCKED

Layer	Status
Protocol v0.1 / provisional defaults / retire GATE-03 P1	Pack written
Formula layer	SOURCED (protocol)
Apparatus Objects 1–5	**OPEN** (Object 1 meter unnamed)
Collection	**LOCKED** until Objects 1–5 are apparatus-sourced
Theory Track C	Parallel; **not** empirical closure

No invented laboratory J / S / interferometer maps. No completed-ToE certificate.

Next-wave Band-1 (post tonight_ten) — this dash

Probe	One-line result	Claim level
Hadamard single order **52**	Paley II / GF(25): $HH^{\mathrm{T}} = 52I$ certified (`max_abs=0`); closes prior ≤ 64 on-box gap; **2004** still open large / not searched	**NOT** full Hadamard conjecture
No-three-in-line finite	Box $D(1) = 1$, $D(n) = 2n$ for $n = 2..12$; lit next open $2n$-existence $n = 75$; asymptotic **OPEN**	**NOT** asymptotic N3IL solved

Honesty banner

- **No Clay stamps** (NS, YM, BSD, P vs NP, RH, ...).
- **No finished Theory of Everything.**
- **GATE-04 collection remains LOCKED.**
- Band-1 = finite certificates / ledgers / agendas only.
