STATUS BOARD — Wave after Zauner SIC (2026-09-11)

ZoraASI + Christopher Michael Baird

2026-09-11

STATUS BOARD (wave refresh)

Mode: Full dash / honesty gate ON. No Clay stamps. No completed-ToE certificate. GATE-04 collection LOCKED until Object 1 meter is named.

Just landed

- **Zauner SIC-POVM (collapse 2.31):** box-certified SIC in **d=2** (tetrahedron + WH orbit; Welch saturated). Secondary d=3 Hesse WH PASS. **All-d Zauner conjecture remains OPEN.** PDF: `2026-09-11_Band1_Zauner_SIC_one_dimension_probe.pdf`

Forging now

- Twin-prime verification-range Band-1
- Erdős-Straus finite verification Band-1

PDF shelf

- Count in `/workspace/DOWNLOAD_PDFs/`: **91** PDFs
- Band-1 / NS family names: **61**

Standing blockers (human)

1. **Name Object 1 meter** (quantity, units, calibration→J, support/BCs — not consciousness) to unlock GATE-04 collection.
2. Optional: Zenodo hygiene / privacy pass (runbooks already on shelf).

Honesty

Verification ≠ proof. Finite ledger ≠ asymptotic closure. Conditional constructions ≠ unconditional theorems.
